

What is Family Fun Night?

The Math and Movement® Active Learning Fun Night is a two-hour afternoon or evening event loaded with enjoyable activities for both numeracy and literacy. Children have the opportunity to learn math and reading concepts by hopping on the floor mats or using the banners.

What is Math and Movement®?

Math and Movement is a kinesthetic, multi-sensory approach to teaching math that incorporates physical exercise, stretching, cross-body movements, yoga, breathing and builds on the success of programs created by Paul E. Dennison, and the work of Eric Jensen, Howard Gardner, John Ratey as well as the Waldorf and Montessori teaching philosophies.

Children love to move. Math and Movement harnesses children's natural love of movement and creative imagination to master basic math concepts of addition, subtraction, telling time, skip-counting, multiplication and moves on to include division, fractions, factoring, positive/negative numbers, and more.

In a time when budget cuts are looming and obesity rates are at an all time high, educator Suzy Koontz has developed a method for children to learn faster, more efficiently and get quality exercise while learning. But the best part is—kids love math, when they can move to the numbers!

How can I book a Family Fun Night?

Call (607) 233-4209 to check availability. Print order form, (below), and mail it to us with a 50% deposit to save the date:

Math and Movement
PO Box 4017
Ithaca, NY 14850

What are the Door Prizes

The door prizes include ten books for teachers, parents and students. Books include *Multiply With Me, Learning to Multiply Can Be Fun, Teacher Guide* (3), *Multiply With Me, Learning to Multiply Can Be Fun, Student Workbook* (3), and *Spelling Animals I* (4).

What are the 30 Stations?

The stations include both activities for numeracy and literacy. Seven stations are for the hopping mats. They include Hopping by 2's, 3's 4's, 6's, 7's, 8's and 9's. Other stations include the Place Value Hop (three stations), Clock Hop, Cartesian Coordinate Hop, Positive/Negative Number Hop, Giant 100 Number Grid, The Fraction Walk (two stations), Skip Counting banners (5 stations), Hop Scotch for Threes, Number Line (0-10) Hop, Alphabet Hop, Word Blending Hop (7 stations), Color Hop, Word Hop (3 stations)

What is the training for teachers and volunteers?

Included in the two-hours is ½ hour of training for teachers, parents and volunteers on how to use the Math and Movement® and Hop into Literacy® floor mats and banners. Often the training occurs from 5:30-6:00 and the Math Night begins at 6 and concludes at 7:30.

What do you mean that this is a \$5,000 value?

If you were to purchase the floor mats and banners outright and pay for the books and training, the cost would exceed \$5,000.

Are the floor mats available for sale?

Yes. See <http://mathmadefun.com/mathshop/>

If you are interested in a grant, contact suzy@suzykoontz.com

What are the advantages of hosting a Family Fun Night?

1. It is FUN!
2. Use the event as a fundraiser to make money for your school or organization.

3. Math and Movement activities boost children's confidence!
4. Children receive a physical workout from hopping on the Number line hopping floor mats to learn the multiples
5. Parents have as much fun as children. Everyone is amazed at the math patterns that come to life on the giant 100 number floor mat.
6. Children need LOTS of practice in both math and reading to be fluent. Some children resist sitting down to practice for long periods of time. The floor mats provide enjoyable practice. Encouraging children to use the floor mats on a regular basis allows the necessary practice time for children to reach mastery in their skills.
7. Children enjoy practicing blending words with the literacy mats!
8. Parents are amazed at the math ability of their children. It is incredible to see young children to learn about advanced math concepts such as positive and negative numbers and Cartesian coordinates, multiples and fractions.
9. Host a math night to see me see how easy it is to learn when children can move to the numbers!
